

'One Step Ahead' Workshop Product Stewardship

Tuesday 29 October 2024 - 09H SAST

Protea Hotel by Marriott® O.R. Tambo Airport - Johannesburg

ISOPA, the Diisocyanate and Polyol Producers Association, is delighted to invite you to ISOPA's coming one day seminar on Product Stewardship focusing on the safe handling of Diisocyanates , e.g. TDI and MDI.

ISOPA has been developing and sponsoring a programme called **"ONE STEP AHEAD"** since 1999 with the specific intention of sharing industry best practices with Diisocyanate users particularly in relation to the hazards involved when shipping and handling these chemicals. Experts from ISOPA Member Companies will speak about all aspects of Environmental, Health and Safety (EHS) and our Product Stewardship program in relation to Diisocyanates.

A presentation of PPE (Personal Protective Equipment) will also be included in this session. Seminar participants will receive detailed information concerning Diisocyanate safe handling, including video in digital format as well as a poster for EHS communications back in your own factories.

This event is open to system houses, distributors, machinery suppliers, logistics partners, company directors, factory or production line supervisors and managers, but in particular the participation of people with technical background would be highly valued.

This session will take place in English and is for **free** (including lunch).

Please **register** [here](#) to join us on 29 October 2024.

In the hope of meeting you in Johannesburg,

Yours sincerely,

Jörg Palmersheim
Secretary General
